PROTECT YOUR BEAUTIFUL NEW FLOOR

While your laminate flooring is highly resistant to stains and abrasions, it is not indestructible. In order to maximize the durability and beauty of your laminate floor, we recommend the following practices as part of your floor's normal care and maintenance.

- Place a natural or colorfast mat at outside entrances to collect tracked-in dirt and absorb excess moisture.
- For added indentation resistance, use felt floor protectors on chairs and other furniture. As a general rule of thumb, the heavier the item, the wider the floor protector should be.
- Avoid sharp or pointed objects with concentrated weight such as high heels on your floor.
- Rearrange furniture occasionally for increased indentation resistance.
- Do not treat or seal your laminate floor panels after they are installed.
- Never sand, lacquer, or refinish your laminate flooring surfaces.

ROUTINE CARE

- Vacuum, use a dust mop or wipe with a damp cloth.
- For spills, just wipe up with a cloth or sponge.
- Do not use soap-based detergents or "mop and shine" products, as these may leave a dull film on your floor.
- Do not use abrasive cleaners, steel wool, or scouring powder, which can scratch your floor. And, in very sandy areas or at the beach, sweep or vacuum regularly.
- Do not wax or polish your floor.
- Laminate flooring, like other types of smooth floors, can become slippery when wet. Allow time for floor to dry after washing. Immediately wipe up wet areas from spills, foreign substances, or wet feet.
